The diagram illustrates a sequence of database tables and their dependencies. The tables are arranged horizontally from left to right:

- d_financials**: Contains columns FK1 and PropertyID. It has a self-loop arrow at the top.
- d_Fertr**: Contains columns FK1 and PropertyID. It receives an arrow from d_financials.
- d_financialsr**: Contains columns FK1 and PropertyID. It receives an arrow from d_Fertr.
- d_Mgmtr**: Contains columns FK1 and PropertyID. It receives an arrow from d_financialsr. A dashed vertical line is positioned to its left.
- d_supplementsr**: Contains columns FK1 and PropertyID. It receives an arrow from d_Mgmtr.

Arrows indicate the flow of data or dependencies between the tables. A dashed line separates the first three tables from the last two.
